Sorry Davis.

If you haven't sent the RTC check table over with the Dive Safety information yet, please use this table to send over. Howard found that we were missing a response #7 in the RTC check table. It was an adequate response (green), but they may ask about it since the previous table didn't show that the response is acceptable.

Thanks Scott;

Davis, if we could use this one in addition to what Scott sent that would be great. I think it's better in a couple of ways and compliments the RSS plan. Also, I don't know what dive mode they intend, so this gives them examples of both surface supply and scuba.

Thank you.

Importance: High

Hi Davis.

I recommend sending this table to Ken as we've done for the previous reviews. It's updated slightly from the one provided last night (just a minor comment number edit – we had two #5 comments under our TBC comment list. The

table highlights what we discussed and also cues them to provide the RLSO HASP so we can have the final and check that they've included the revisions they said they would in their responses.

Also providing two attachments covering the RM11E Dive Safety HASP that Sean recommended providing them as it provides the details of what EPA expects for Diving activity safety.
